

VEDANT RANSINGH

+91 934-042-8929 | Bangalore, Karnataka | ransinghvedant@gmail.com | linkedin.com/in/vedant-ransingh/

PROFESSIONAL SUMMARY

Results-driven Computer Science student with a strong foundation in data analysis, machine learning, and software development. Proven problem-solving abilities and a passion for transforming data into actionable insights. Eager to contribute as a Data Analyst through an internship or full-time role, bringing analytical expertise and a proactive mindset to drive data-driven decision-making.

EDUCATION

Dayananda Sagar University, Bangalore

September 2021 – June 2025

Bachelor's in Computer Science and Technology | CGPA: 5.97

Delhi Public School, Dhamtari

12th Standard: 73% (March 2020 – May 2021) | 10th Standard: 74% (March 2018 – April 2019)

TECHNICAL SKILLS

Statistical Analysis: Basic Statistics and Probability

Programming: Python, C++, HTML, CSS, JavaScript

Tools & Software: Tableau, Microsoft Office Suite (Word, PowerPoint), VS Code

AI/ML Tools: CNN Model, LSTM Model

EXPERIENCE

Unified Mentor Pvt Ltd. – Frontend Developer Intern

March 2025 – May 2025 | Bangalore, India

- Contributed as a Frontend Developer in developing a product marketing website for the Kashmir region under the One District One Product (ODOP) initiative.
- Worked on frontend functionalities, responsive design, and website presentation for better digital engagement.

VMAT Co. Ltd. – Freelancer, Full Stack Web Developer

January 2025 – Present

- Developed and maintained responsive full-stack web applications for the company's business requirements.
- Designed and developed user-friendly full-stack web applications using HTML, CSS, JavaScript, modern frameworks, backend APIs, and database integrations.

ACADEMIC PROJECTS

Animal Recognition | Python, Machine Learning, CNN Model

- Led a team of 3 to develop a machine learning model with 90%+ accuracy for classifying animal species from a 10,000+ image dataset, gaining hands-on experience in data preprocessing and boosting technical proficiency.
- Responsible for curating, cleaning, and preprocessing the animal image dataset, ensuring high-quality input data that significantly contributed to the model's 90%+ accuracy.

Stroke Risk Prediction Web Application | Machine Learning, Python, ECG/ECHO Data, Clinical Data

- Developed a full-stack web application that predicts personalized stroke risk levels (Normal, Medium, High) using machine learning models trained on ECG, ECHO, and clinical data.

- Responsible for developing the frontend interface and integrating ECG and ECHO data inputs, which enhanced user interaction and significantly improved the model's prediction accuracy.

CERTIFICATIONS & ACTIVITIES

- NPTEL in Cloud Computing
- Participated in Manthan Competition
- Participated in Game Development
